**Hiring Manager  
Bombardier, QC, Montreal**

**Dear Hiring Manager,**

I am writing to apply for the **Analyst, Finance – Rotational New Grad Program (Requisition 8237)**. As a graduate student from Master of Applied Computer Science at Concordia University, I am deeply passionate about applying my academic knowledge in real-world problems. My aim is to gain hands-on experience, contribute meaningfully to a professional team, and grow as a developer in AI, machine learning, and data analytics.

I bring strong hands-on skills in **SQL, Python, MS Excel, and Power BI**, along with machine learning frameworks (PyTorch, TensorFlow, Scikit-learn) experience building end-to-end data workflows through projects (data preparation, analysis, and clear performance reporting), and practical experience through personal projects. These include detecting machine-generated text using LSTMs and building a machine translation system using Hugging Face Transformers, among others. I am also certified in AWS and Tableau, which supports my capability to manage cloud-based and data visualization tasks.

More than a formal role, I am seeking an opportunity to learn by doing. I am adaptable, active and a fast learner who is willing to invest time and effort to contribute to your ongoing projects.

I would greatly appreciate the opportunity to connect and further discuss how I can add value to your team while developing my skills. Thank you for considering my application. I am available to start immediately.

**Sincerely,  
Naveen Rayapudi**
