Hiring Committee
Alberta Machine Intelligence Institute (Amii)

Dear Hiring Committee,

I am applying for the **Generative AI Residency** in collaboration with **Outsyders**. I am currently completing a **Master of Applied Computer Science at Concordia University**, with strong academic and project experience in **deep learning, computer vision, and generative AI**. I am highly motivated by the opportunity to work under Amii's mentorship while contributing to research in **diffusion-based video inpainting for stereo conversion**.

I am proficient in **Python** and have hands-on experience with **PyTorch, Hugging Face Transformers, and OpenCV**, building end-to-end machine learning pipelines including data preparation, model training, evaluation, and optimization. My projects have followed reproducible experimentation practices and provided a solid foundation for adapting to **diffusion models and spatiotemporal video architectures**.

A key accomplishment I am proud of is developing an **end-to-end neural machine translation system using Transformer architectures**, where I managed the full ML lifecycle and achieved strong results using **F1 and METEOR** metrics. I have also worked on large-scale deep learning projects involving **LSTM-based models trained on 600K+ samples**, strengthening my ability to analyze model behavior, robustness, and real-world constraints.

I am a motivated, fast learner with strong collaboration and communication skills, eager to contribute to interdisciplinary teams and applied research. I am legally eligible to work in Canada and available to commit fully to the twelve-month residency.

Thank you for your time and consideration. I would welcome the opportunity to further discuss my fit for this role.

Sincerely,
Naveen Rayapudi
